Introduction

About this Document

This document contains the instruction that described installation and removing process of the ViPNet SafeDisk Mobile, and registration process and initial start as well.

Terms and Abbreviations

PC – personal computer (desktop computer)

PDA – (Personal Digital Assistant, mobile computer). The ViPNet SafeDisk Mobile that is described in this document is designed for such a computer.

1 System Requirements

1. Requirement to PDA: ARM-based processor.
2. Requirement to operating system: The ViPNet SafeDisk Mobile works under Windows Mobile 2003, Windows Mobile 2003 SE and Windows Mobile 5.0 Operating Systems.
3. MS Outlook must be installed on the desk computer to provide mails exchange (especially for ViPNet SafeDisk Mobile registration).
4. Microsoft ActiveSync must be installed on the desk computer to provide copying files from PC to PDA and back.

2 Install ViPNet SafeDisk Mobile

ViPNet SafeDisk installation has two stages:

1. The first stage is carried out on PC
2. The second stage is carried out on PDA.

2.1 The First Stage of the Installation

To do the first installation stage you need to:

1. Run setup.exe file on PC. If you install the program in the first time of if the program was deleted earlier that after you run the file a window with greeting and useful information about the program and its usage will appear (Figure 1). Click **Next**.

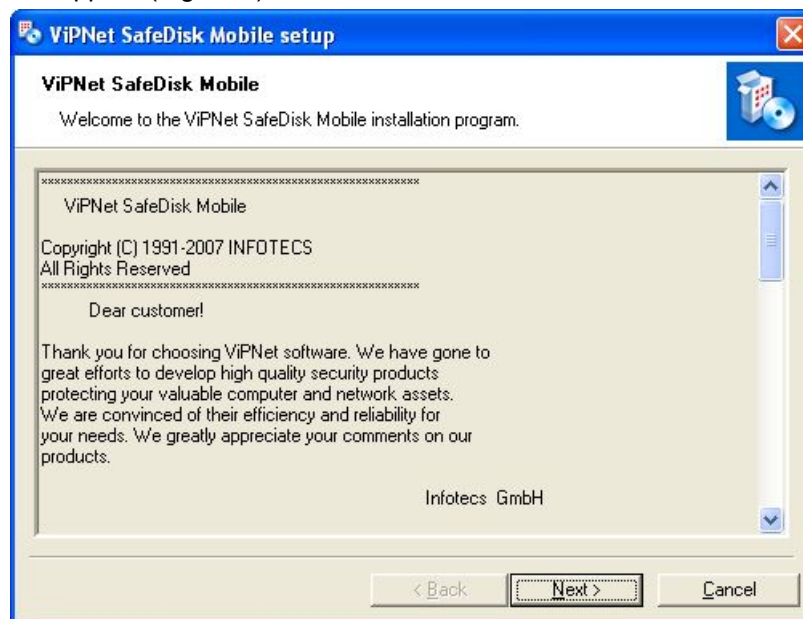

Figure 1

The window with license agreement will appear (Figure 2). Read through the license agreement and, if you are happy with the terms, select **I accept the terms in the license agreement** option and click **Finish**. To return to the previous window, click **Back**.

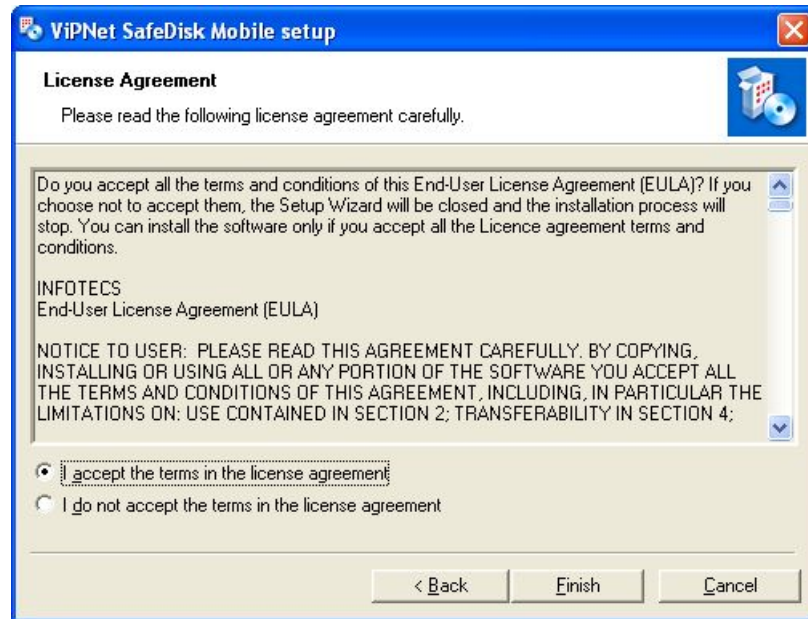

Figure 2

If you install the program over the previous program version you will see the following message on the screen of PC (Figure 3):

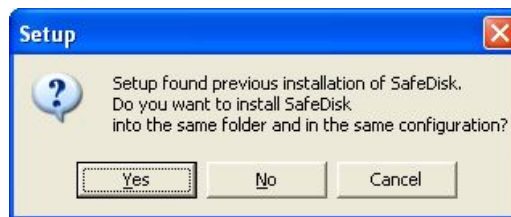

Figure 3

If you choose **Yes** the installation program will continue the installation.

2. The installation program will prepare and automatically run the second stage of the installation on PDA, using Microsoft ActiveSync connection. Preliminarily the installation program will ask whether install or no the SafeDisk program to the default folder (in the main storage) (Figure 4). If you choose **Yes** the second stage will begin (on PDA).

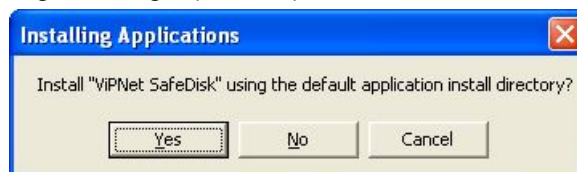

Figure 4

If you choose **Cancel**, the installation will be interrupted. If you choose **No**, the installation program will offer you to select Main Memory or storage card for installing SafeDisk on the PDA (Figure 5):

Figure 5

If you chose **Yes** (Figure 4) (and if you choose **No** (Figure 4) and click **OK** at selecting destination media Figure 5) the first stage of the installation on PC will continue (Figure 6). Then the second stage will begin (on PDA).

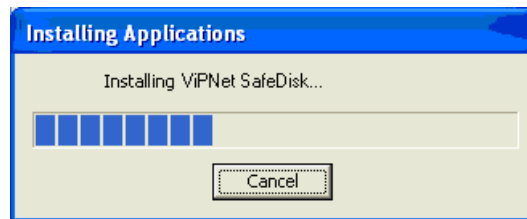

Figure 6

If you choose **Cancel** (Figure 4), the installation will be cancelled.

2.2 The Second Stage of the Installation

The following actions will be done in the second stage of installation:

1. The program is installed in “\Program files\InfoTeCS\ViPNet Safe Disk” folder by default. You can change default path, and also you can install the program into the storage card, for example, iPAQ File Store, Built-in Store in dependence of PDA type.
2. Shortcuts of the program will be created in “\Windows\Start menu

Figure 7 shows the second stage of the installation:

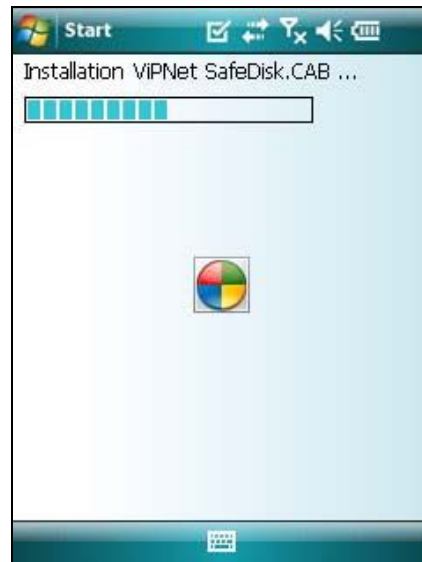

Figure 7

Warning: After installing ViPNet SafeDisk Mobile, it will work as full-functioned version, but trial period is limited by 30 days. When the trial period is expired, an access to the program will be impossible. You won't be able to use this program not only for mounting, but for deleting containers, created earlier. An access to secret disks will be lost. To use the program after trial period you should register it (see chapter 3).

3 ViPNet SafeDisk Mobile Registration

After installation of ViPNet SafeDisk Mobile, you will have to register the software after 30 days to continue using the program. Every time you load the unregistered program you will be reminded of the amount of days left for registering the program (Figure 8). If you run registered program the window won't be appeared.

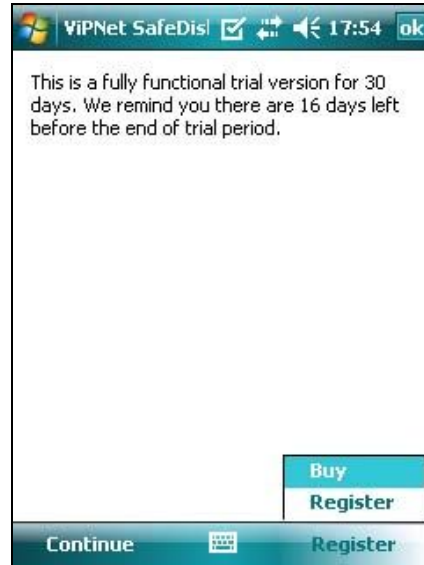

Figure 8

If you do not want to register the program just now, click **Continue**. To terminate the loading process, click **OK** in the right upper corner of the screen.

Note: You can register the program anytime from the main menu of the ViPNet SafeDisk Mobile.

If you decided to register the program follow these instructions:

1. **Buy** a serial number (you have no serial number, because you could download trial version).

Note: If you have a serial number, go to point 2.

Read the various payment options by clicking **Buy** (Figure 8). You will be linked to the website of the manufacturer Infotecs (www.infotecs.biz). As soon as you pay for ViPNet SafeDisk Mobile software you will receive **the serial number**.

2. **Registration.**

After receiving the serial number start ViPNet SafeDisk Mobile and click **Register** button (Figure 8). The registration window will open (Figure 9).

A screenshot of a mobile application window titled "ViPNet SafeDisk Mobile" showing a registration form. The form has three input fields: "User Name:" with the value "John", "Company:" with the value "InfoTeCS", and "Serial number:" which is empty. At the bottom of the window, there are two buttons: "Back" and "Finish". In the top right corner, there is an "ok" button and a time display of 17:40.

Figure 9

Enter the serial number in the **Serial Number** field. **User Name** and **Company** fields will contain your name and company name correspondingly. Click **Finish** button (Figure 9).

ViPNet SafeDisk Mobile is registered. You can begin to work with the registered program.

4 Getting Started with ViPNet SafeDisk Mobile

To start the ViPNet SafeDisk Mobile tap  SafeDisk from the Start menu.

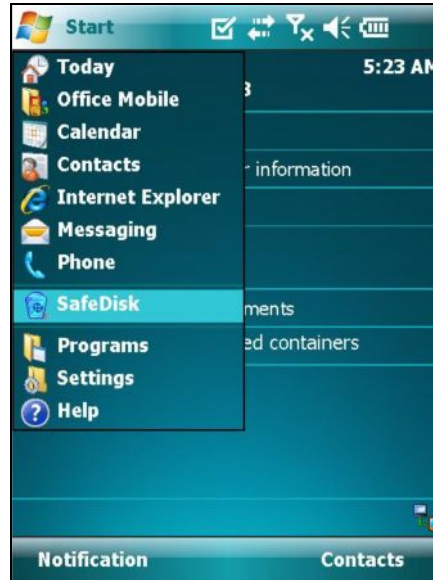

Figure 10

The password window will appear (Figure 11).

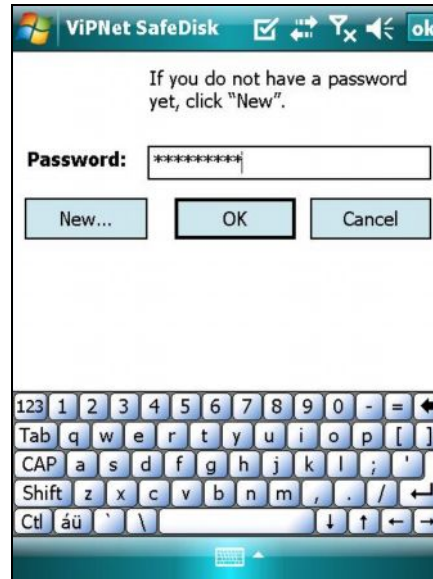

Figure 11

To start work with the program you need to register a user. User registration means the user must have a password to enter the program.

To register a user tap **New** button (Figure 11). After tapping the button the window to choose password type will appear. You can choose one of the two types of password: **User-Defined** or **Random**.

After typing the password the ViPNet SafeDisk Mobile main program window will appear.

For more information about user registration, typing password and further usage of the ViPNet SafeDisk Mobile read the special user guide "ViPNet SafeDisk Mobile", included in the delivery set.

5 Uninstall ViPNet SafeDisk Mobile

To uninstall the program use **Add/Remove Programs** option in Windows.

Let's describe the deinstallation process of the program.

Select **SafeDisk Mobile** program from the **Add/Remove Programs** window on your PC and click **Change/Remove** button. The deinstallation program will ask: "Do you really wish to uninstall SafeDisk Mobile?" (answers: OK, Cancel). If you choose OK, an appropriate window on the PC screen will appear (Figure 12),

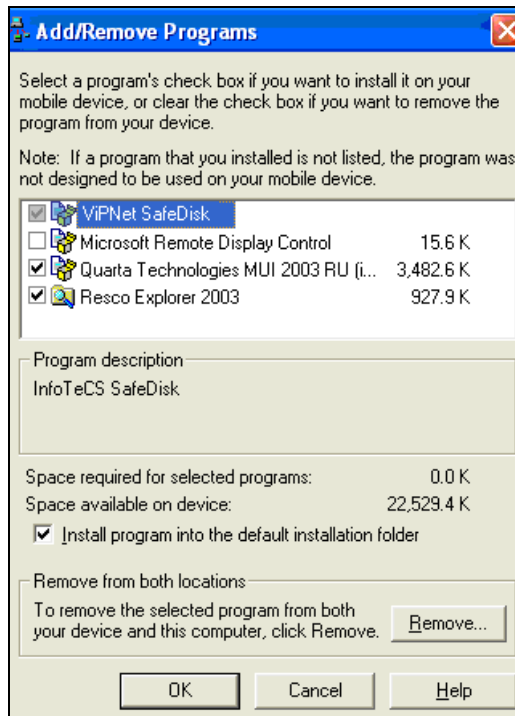

Figure 12

Select the program (**ViPNet SafeDisk**) you want to remove and click **Remove** button. Clicking this button will remove the program from the both computers (PC and PDA). Warning message about the removing will appear (Figure 13). Click **OK**.

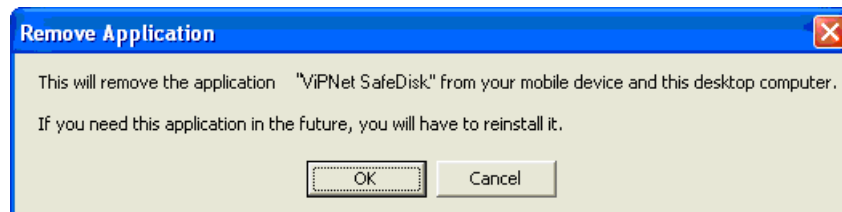

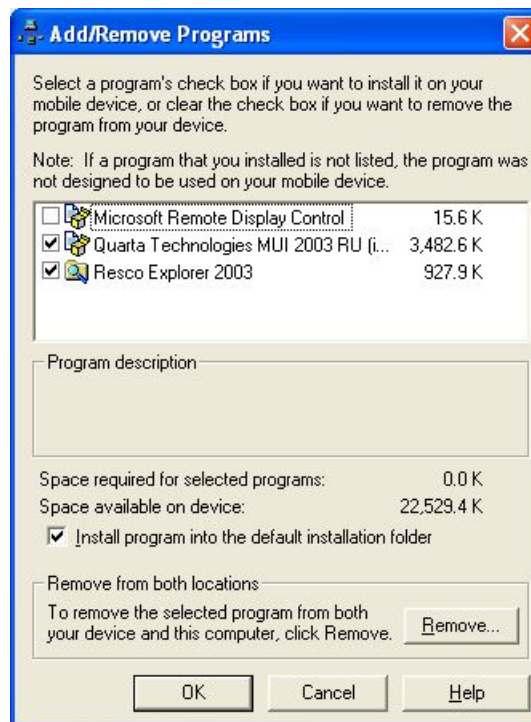

Figure 13

After clicking **OK** a window with listed programs will appear (Figure 14). The **ViPNet SafeDisk** program will be absent in this window. That means the program is uninstalled. Click **OK** in this window.

**Figure 14**

After removing the program files, the ViPNet SafeDisk Mobile installation folder will contain program registration files and also files, containing information about containers and users of the ViPNet SafeDisk Mobile. The deinstallation program will offer you to remove these files or no. If you want to use these files for the next installation of the ViPNet SafeDisk Mobile don't delete them (answer **No**). In this case all these files will be saved. If you want to save program registration you can manually save **sd_m.brg** file. Then choose **Yes** on the question about removing files. Then put the **sd_m.brg** file in the new installation folder and install the program. Also you can save all files' set to use them in the next installations (in other installation folder).
