

Infotecs and FSM Group at the biggest Northern Europe's security event

Berlin/Helsinki, August 29, 2017 – Infotecs, the international cyber security and threat intelligence provider, is an exhibitor at FinnSec, the most important safety and security event in the Nordic Countries. The security experts of Infotecs are showing here their encryption solutions at the stand 6e50 of the partner company FSM Group, the leading distributor of safety engineering solutions in Finland.

Infotecs will be presenting its security solutions from September 26 to September 27, 2017, at the international event [FinnSec](#) in Helsinki, Finland. FinnSec is the biggest security and safety exhibition in the Nordic Countries. Its exhibitors represent all safety and security market segments: from fire protection and safety engineering through video surveillance systems and anti-theft protection to cyber security and data security.

Infotecs will be presenting its solutions and products again at the shared stand with its partner, [FSM Group](#). FSM Group, the value added distributor, is considered the leading vendor of security engineering in Finland, having video surveillance systems as its main competence area. Its product portfolio includes alarm systems, surveillance cameras, security engineering systems, and fire protection systems. With its market share of 45 %, FSM Group is the market leader in the area of IP video camera systems in Finland. Starting from January 2015, the Finnish company cooperates with the IT security provider Infotecs.

FSM Group uses Infotecs' ViPNet Technology for its IP video camera systems for encrypting transferred data. In these systems, ViPNet can establish encrypted channels from the surveillance post to the IP cameras. Cyber criminals are not able to access the cameras' IP addresses over the network and cannot obtain views of the areas controlled by the cameras. Intruders cannot manipulate video signals from the cameras. External attacks, like man-in-the-middle, can be completely avoided with ViPNet. FSM Group's clients and distribution partners, for example deployment specialists and system integrators, benefit from secure encryption of their data and can meet high security standards of their business area.

"The northern market has turned into an important area for Infotecs, as innovative solutions are being implemented here really early", explains Josef Waclaw, CEO of Infotecs GmbH. "We are happy to strengthen our partnership with the value added distributor FSM Group and to establish new international customer contacts in the Nordic Countries."

About FSM Group

FSM Group is a leading supplier of safety engineering solutions in Finland having nationwide reseller network. As a value-added distributor, it offers a wide range of services along with solid know-how and cooperates with the best brands. The company has more than 25 years of expertise in the security field, and over the past few years it has been growing strongly in networking business. About Infotecs

A leading international security solutions provider and pioneer of software-based VPN solutions since 1991, Infotecs developed its Peer-to-Peer ViPNet technology to deliver greater security, flexibility, and throughput than other solutions on the market. The Infotecs ViPNet Security and Threat Intelligence Platform provides complete multi-layer security in one cost-effective solution. ViPNet is the only solution that supports true endpoint-to-endpoint security and delivers robust security which is scalable, flexible, easy to deploy, manage and maintain. The ViPNet solutions seamlessly integrate into existing networks enabling customers to achieve the right balance of high security with low complexity and low risk. More than 1,000,000 clients, offices, and servers have been securely connected with ViPNet solutions, backed up by an unparalleled world-class support, development, and technical team as well as a strong network of partners.
