

Infotecs to showcase Security for Industry, IoT and Mobile at Infosecurity Europe

London/Berlin, April 25, 2017 – The international Cyber Security and Threat Intelligence provider Infotecs is going to exhibit at Infosecurity Europe, 06-08 June 2017 in London, and will present robust, advanced and cost-effective security solutions for Mobile, Industry, Internet of Things (IoT) and more. Interested professionals can make an appointment in advance at the Infotecs stand L02 in the New Exhibitor Zone.

Today's world is being dramatically impacted by digitalization. The old world of isolated computers and company controlled networks has become a connected world of Clouds and Things many of which are outside the direct control of the enterprise. Numerous legacy systems and devices are now connected which were never designed with security in mind. In this brave new digital world of pervasive mobile computing, connected coffee makers and the Industrial Internet, the traditional boundaries of the corporate network are being constantly re-defined and the surface area of vulnerabilities and threats has exponentially increased. This makes the challenge of properly safeguarding and securing critical information and the risk of not doing so more complex and severe than ever before. Enterprises and organizations of all sizes need to consider new thinking and innovative approaches to security to keep pace and prosper in the digital world.

Infosecurity Europe is a platform to address the important security issues which companies face today. This year the international high-security provider Infotecs will exhibit for the first time at Europe's largest and most comprehensive IT Security event. Infosecurity Europe takes place in London, an international centre for technology start-ups and innovation. More than 18,000 industry professionals are attending to share best practices, updates on current trends and learn about the latest cyber security products and solutions from over 360 vendors and exhibitors.

Infotecs' mission is to give organizations the best solutions to meet these constantly evolving challenges of the connected world by providing innovative, robust, cost-effective solutions for the toughest cyber security challenges designed with the future in mind. At Infosecurity Europe Infotecs will showcase their ViPNet Security and Threat Intelligence Platform in the New Exhibitor Zone at stand L02. The Infotecs platform delivers complete multi-layer security in one cost-effective, modular solution. It provides comprehensive Information Security enablement encompassing Network Security, Mobile Security, Industrial Control Systems and SCADA Security, Cloud Security, Secure Unified Communications, Secure Collaboration and security for the Internet of Things (IoT). ViPNet is the only solution that supports true endpoint-to-endpoint security and delivers robust security that is scalable, flexible, easy to deploy, manage and maintain. The military grade, unique point-to-point encryption is certified to exacting internationally recognized standards. ViPNet solutions seamlessly integrate into existing networks and support network segmentation enabling customers to achieve the right balance of comprehensive security with high performance, low complexity and maximum return on investment.

"We are very pleased to be show-casing our solutions at this important international IT security event in London" says Josef Waclaw, CEO of Infotecs GmbH. "The event gives us the opportunity to continue to build

on our successful expansion into the broader European, UK and world-wide market through meeting new potential resellers along with existing partners and customers.”

Interested companies can contact Infotecs before the event to make an appointment to meet one of the experts at Infosecurity Europe: call +442071935287 or mail to info@infotecs.co.uk.

About Infosecurity Europe
